

# Alco Mountaineer cab 1 - both types

Fold bunker and cab frames 2 & 3 and fit into the slots in the footplate

Cab floor upper, shown upside down

Cab floor lower, solder to upper on the side with etched lines, line up edges and holes and fold down the 2 strips after soldering

Remove this Y piece after the edges are soldered

12BA nuts soldered over holes

# Mountaineer cab early 2

Bunker rear 10 needs to be folded to match the shape of the sides, it fits between the sides with the top rib facing outwards.

# Mountaineer cab early 3

# Mountaineer cab later 2

# Mountaineer cab later 3
